

AccuDry™ 2

AccuDry™ 2 uses a patented combination of alternating single and cabled monofilament CD yarns in a laminated 1+1 structure to maximize **batt attachment** and **water flow through** all fabric layers.

Its open structure makes it a good fit for a broad range of basis weights and stock conditions, as well as the rigors of double-pressure roll machines.

Features & Benefits

- Alternating Cabled and single monofilament CD means
 - Unrestricted flow through the fabric for ease of cleaning
 - Improved water handling at the suction pressure roll
 - Superior batt anchorage.
 - Quick start-up without closing-up
- Lower batt to base ratio
 - Ease of cleaning / Stays open
 - Steady state performance
